

21st September 2022

To Whom It May Concern,

As part of the construction works of our upcoming refurbishment of block 1 of Northcote School we are required to remove some asbestos containing materials.

We have engaged a specialist asbestos removal company, licensed by WorkSafe to carry out its safe removal ahead of the demolition.

This work will be carried out on the school holidays beginning week of 3rd October.

During the removal process, air monitoring will be undertaken by an asbestos assessor, licensed by WorkSafe, followed by a clearance inspection to ensure all asbestos containing material has been safely removed.

Please do not hesitate to contact me if you have any further queries or concerns.

Regards

Joss Lightfoot
