

ROAD SAFETY CONCERNS IN WRIGHT STREET

The Dunedin City Council has been working with Kaikorai Primary School on a proposal to improve pedestrian safety on Wright Street during peak traffic times. The proposed plan will allow children arriving and departing by car or on foot to have a safe and convenient crossing point to cross Wright Street.

We propose installing kerb extensions at the crossing point to improve visibility for pedestrians and motorists. The kerb extensions will also shorten the crossing distance for the children and allow some existing no stopping lines to be removed, allowing more on street parking.

The proposed changes are shown on the attached plan. We are seeking your feedback on these changes by Monday 19th December 2016. Please contact Transportation Engineer Ian Martin on 477 4000 or email ian.martin@dcc.govt.nz

Plan showing the proposed crossing point and kerb extensions.

Not drawn to scale

Yours sincerely

Ian Martin
