

Iron Plough

By Izzy and Robert

How was it used?

*The iron plough turns
dirt to help crops
grow.*

When was it first made?

*The iron plough was first
made in June 1797.*

Why was it used?

*To turn soil around
and put new soil on
top meaning it killed
weeds.*

What was it made out of?

*The iron plough had a
wooden handle and
wrought iron point.*

Is it still used today?

The iron plough is not really used today. It can now damage the soil and cause erosion from digging to deep.
