

## Jamf Parent Guide

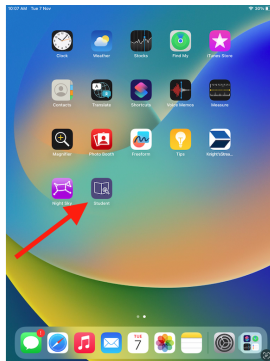

Jamf Parent is an app you can use to manage your child's school-issued device. Using Jamf Parent, you can manage your child's device with the following features:

- **Allow and restrict apps to choose which apps your child can use**
- **Enable App Lock to set a timer for app restrictions**
- **Create locations to see the approximate location of your child's device**
- **Create a Device Rule to schedule app restrictions**

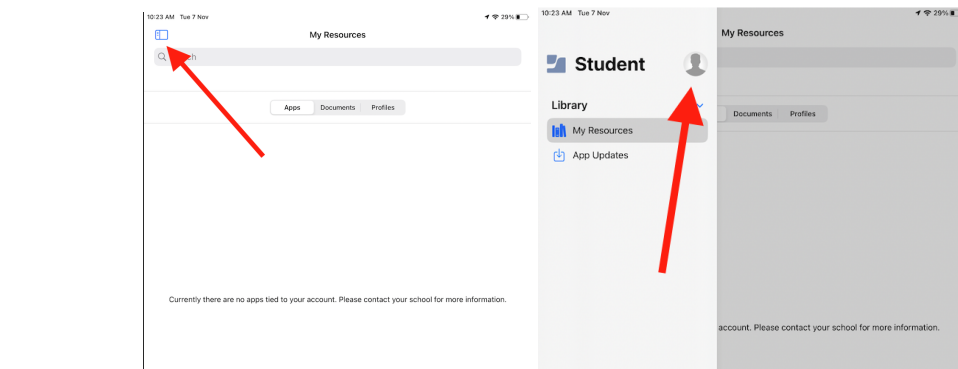

This guide provides step-by-step instructions on how to add your child's device to Jamf Parent by scanning a QR code on your child's device.

### Getting Started

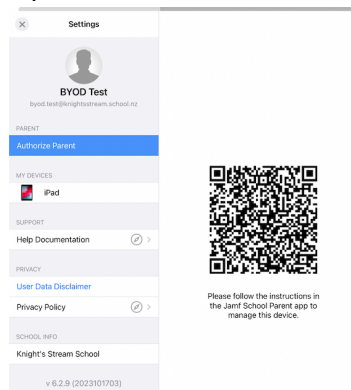

1. Download Jamf Parent from the App Store on an iPhone or iPad (jamf has said this will work with an android device however we have not tested this).
2. Open the Jamf Parent app on your device -> Tap Get Started.
3. Tap **Scan QR Code** and scan the QR code on your child's device (this is found in the Jamf Student app). If this is the first time you are using Jamf Parent, you must allow Jamf Parent to access the camera to scan QR codes and allow Jamf Parent access to iBeacons for the QR code to display on your child's device. You will be given prompts to follow for this.
4. To find the QR code on your child's device open the Jamf Student app

5. Follow the prompts. Accept the App Privacy. Allow bluetooth, location and notifications permissions.
6. In Jamf Student tap the top left icon -> Tap the face next to Student

## 7. Tap Authorize Parent and a QR code will show up

## 8. On your device through Jamf Parent you will now be able to connect your child's BYOD device
