

Dear colleagues,

We would like to invite you to participate in this survey because you are currently involved in delivering clinical care or conducting research related to hepatic steatosis.

This year, the International Liver Society has embarked on a significant endeavour by initiating a modified Delphi process involving experts in the field to evaluate potential changes in the nomenclature of hepatic steatosis. Your involvement is particularly important, as we seek to gather the perspectives of practising clinicians and researchers, with a specific focus on the Asian standpoint, to understand better the implications of adopting the updated nomenclature.

Ensure you have read the Participation Information Sheet before proceeding to answer the survey. Your participation is entirely voluntary, anonymous, and will take approximately 10 minutes. You may indicate if you would like us to contact you for future studies by assessing a separate link at the end of the survey. This study has been approved by the ethical board of the National Healthcare Group's Domain Specific Review Board (DSRB), Singapore – Study Number 2023/00561. Please contact the Principal Investigator if you have questions about this survey study.

The survey can be assessed from the following hyperlink or QR code:

OR <https://form.gov.sg/64bb4b54b0eb80001122dc19>

Thank you.

Sincerely,
Dr Kuo Chao YEW
