Management

## Key Brands (Authorised Agents)

# Core Capabilities

# Systems Integration & Project Management

ENL's solid reputation for engineering, innovation and supply of quality marine electronic products is founded on highly experienced staff and the commitment to excellence.

Key supplier to New Zealand's internationally renowned boat building industry

Turn-key Technology Solutions

Customized solution for virtually any size vessel

Design, install, commission, project management and support services

At any point in time, we are typically running multiple new build or refit projects

We were accredited with ISO9001 in 2006 and continue to improve processes and procedures to maintain our high standard of service

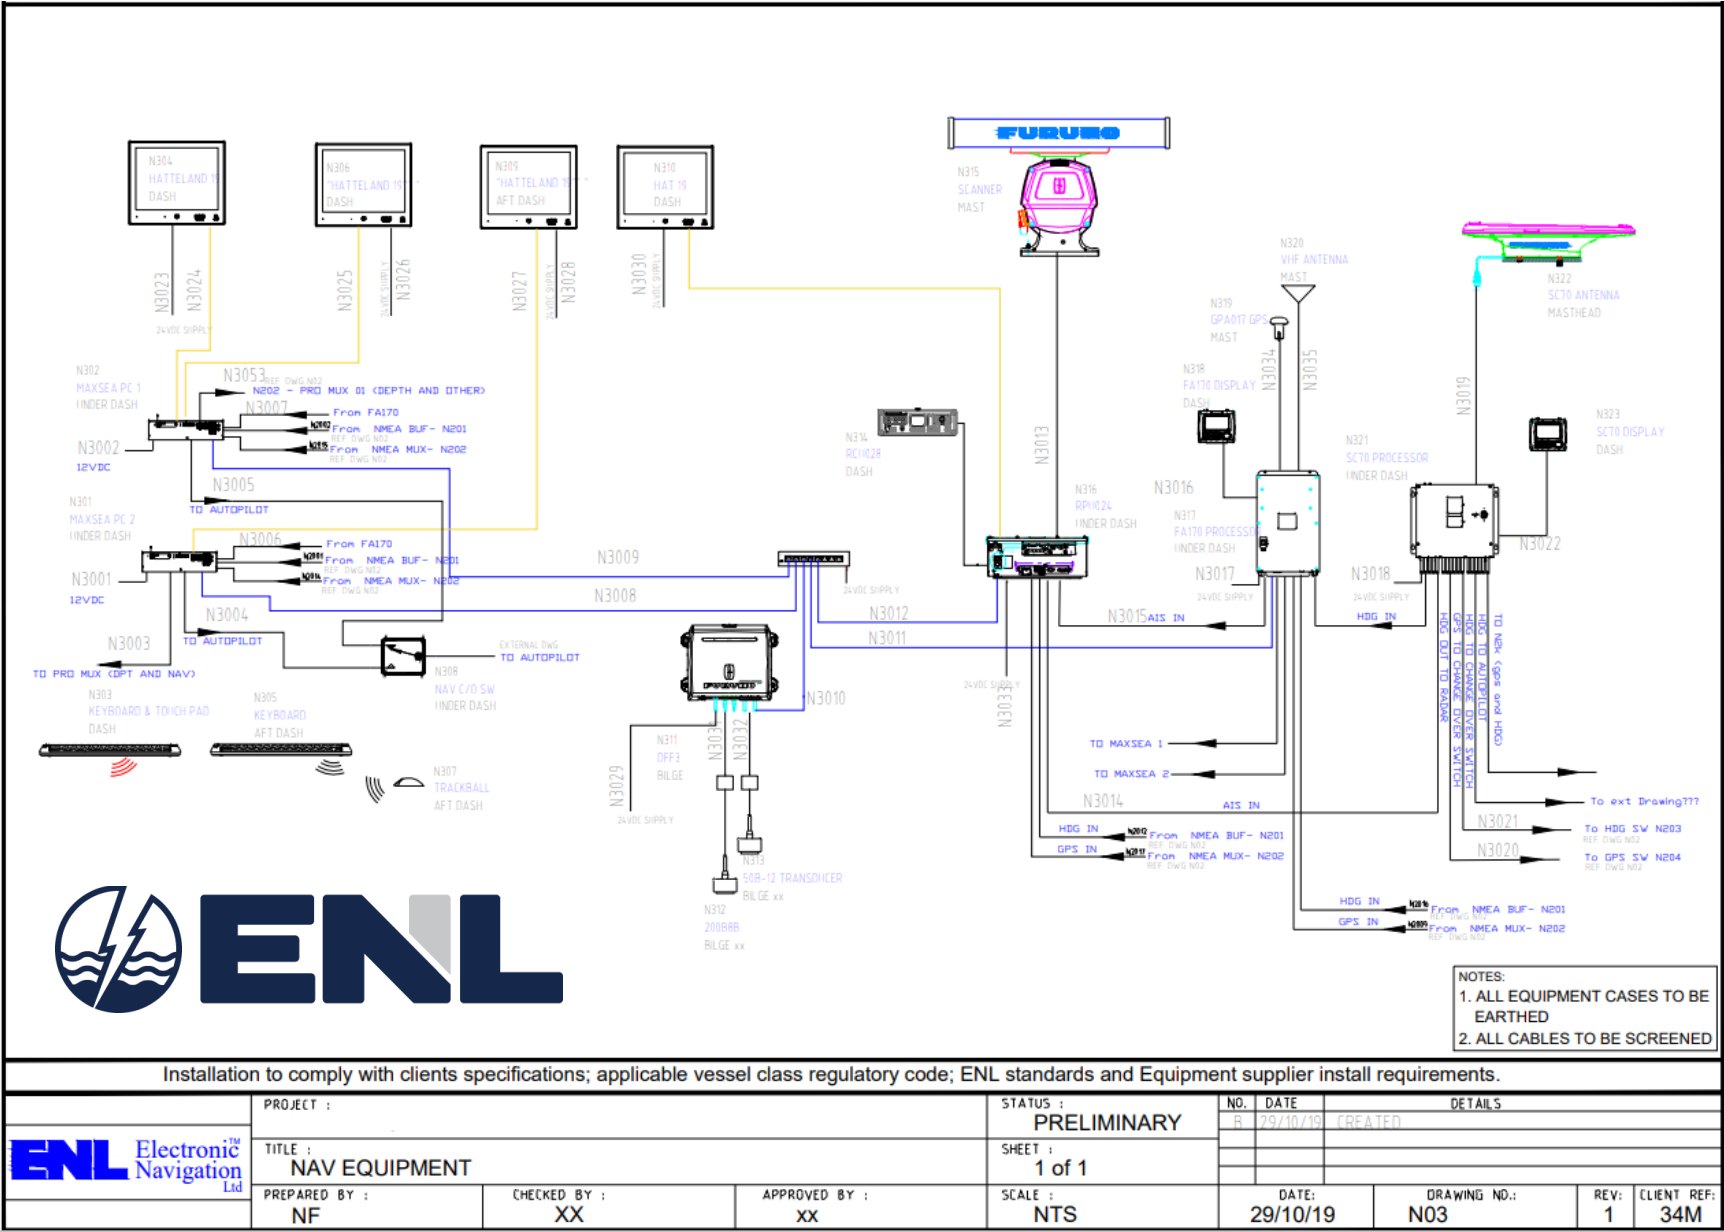

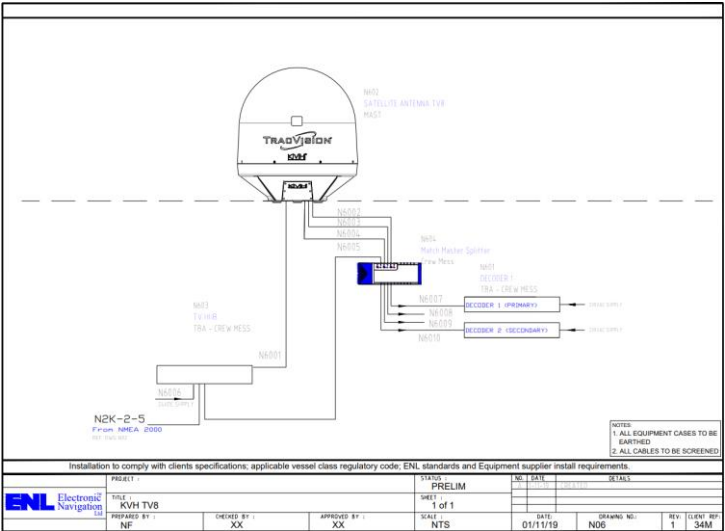

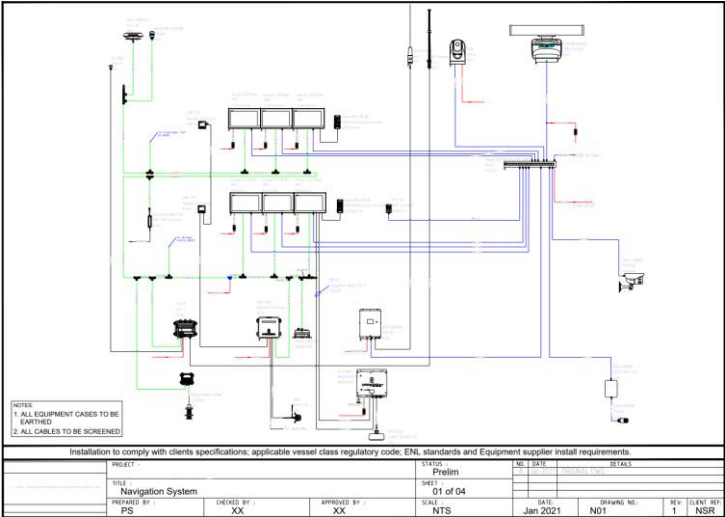

# Research, Development & Continuous Improvement

We provide innovative technology solutions, via “Systems Integration” - combining products from world-leading manufacturers with ENL “know-how” to optimize the technology for each customer.
