

Communicating Learning at Te Ao Mārama School

“Reporting is not an event; it’s an ongoing dialogue between children, teachers and parents”

What to expect ...

We will share learning throughout the year for your child. Through learning stories, we will make links to our values of curiosity, confidence, collaboration, creativity and community-mindedness

The learning stories will also reflect the different learning areas of the New Zealand Curriculum.

Our school curriculum aims to provide rich learning, integrating many learning areas, enabling students to build horizontal connections.

Sharing progress and achievement in the core learning areas of literacy and numeracy. This will happen formally at the end of term 2, and the end of term 4. This is measured against the expectations of the New Zealand Curriculum.

Ways we Communicate ...

LINC-ED

LINC-ED is our online sharing platform. Through LINC-ED we will share learning stories, as well as progress and achievement in the core learning areas.

Hui-a-whānau

We invite families to come and share in their child's learning throughout the year. The purpose of these is for your child to lead a discussion about their learning at Te Ao Mārama

School App

Our school App is the easiest way to keep informed about what's going on at school. Alerts, messages and fortnightly newsletters are shared through this platform

Come in and see us!

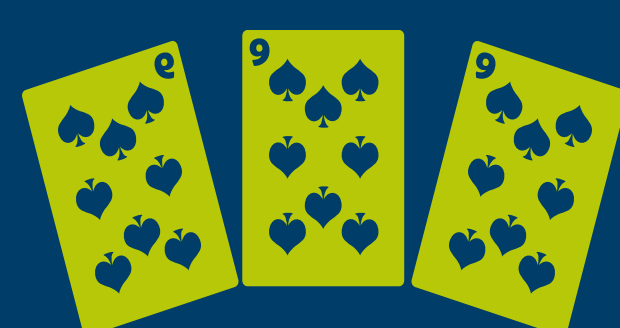

There are many ways to engage with us about learning. Email, telephone, face to face and other open days, we welcome you!

How to help at home ...

Talk with your child; ask about their school day, what is it they are learning? What do they enjoy the most? Help them follow their interests and passions.

Read with your child, or to your child. You can listen to them read. Reading recipes to help with dinner, catalogues and brochures that come in the mail, as well as books they are interested in are all ways you can fit it into life at home.

Play; cards, a board game, a well known family game. This helps build relationships, resilience, creativity and fun

Play sports, join a team - encourage them to be active outside of school hours.
