BYOD
DESIGNED FOR STUDENTS

which device?

Not sure which device is right for your child?
We've developed this handy guide which shows you the recommended minimum specs to help you choose the right device.
THE BASICS

Screen
Must be comfortable for all day use

Hard drive
Windows or OSX minimum 64GB
Chrome minimum 16GB

RAM
Windows or OSX **at least** 4GB
Chrome 4GB is suitable

Battery life
Ideally 8 hours to last through the whole day at school

Weight
Look for small and light devices to make it easy for your child to carry

Mil spec
These devices are purpose built, with a rugged chassis, water resistant keyboard and stronger hinges.

EXTRA INVESTMENTS

Protective case
Reduce the risk of damage, and help extend the life of your device.

Damage protection plan
for the ultimate peace of mind, you'll have everything covered especially those unfortunate accidents.

External keyboard
Use an external keyboard with a tablet for increased comfort and productivity

Touch screens
Supports different modes including drawing and hand writing with a stylus

Stylus
Supports drawing and handwriting which helps improve memory retention

Remember Before buying your device we recommend you check with your school to confirm the operating system they use or if they have specified any devices
