

Teaching at Hornby High School: Person Specifications

Context

The vision for Hornby High School is 'A Centre of creative excellence'. As we pursue this vision we are committed to providing a *caring, progressive and individualised education*. Our community wants all Hornby students:

1. to experience a positive, personally worthwhile education at Hornby High School
2. to leave Hornby High School on appropriate, positive pathways into:
 - i. further education
 - ii. training
 - iii. employment

Hornby High School is committed to success for all, with a specific focus on those students who, statistically, do least well in NZ's education system: Māori, Pasifika and students with special needs.

Ensuring we work hard to try to ensure that Hornby High School students experience a personally-responsive curriculum so they develop positive learning dispositions. A central measure for this is retaining students into the senior school.

Person Specifications

All teachers should have credibility with students, staff, school community and the wider community to contribute to student success.

The appointee should be a positive role model to the Hornby High School community by:

1. having appropriate qualifications, skills and experiences relevant to this position
