

Room 13

Science—Our Senses

We are having a lot of fun with our experiments in Science.

We are using our sense of smell to guess what's in the containers.

Duffy Books

Our special Duffy Books are fun to share before we take them home. We are very lucky to be getting some more soon.

Gymnastics

We are learning to challenge ourselves by going over the vault.

We had to try and land on our feet.

It was fun going on the trampoline and the beam too.

It is a good way to learn to balance.

In Sports skills with Shaun we learnt how to do pencil rolls and different shapes with our bodies.

Scratch Jnr

This computer program is a great way for us to use coding to create animated stories and games.

Spelling using 'The Code'

We are learning a new way to spell. A lot of our words are 'Heart Words' - that we have to know by heart. Each day we name the letters and say the sounds too. We talk about short and long vowels, and consonants.

We love making the actions for the sounds and listening carefully so we can do the dictation.
