### **Year 12 Extension Mathematics**

I would like you to be aware that I will be running tutorials in either D21 or D22 at the following times. I will do a brief introduction covering the “must knows” on each topic, then hand out a question to do. If you prefer to come along and work independently on any questions that you have been working on at home then that would also be welcomed.

If there is an issue with availability of these rooms at any time then I will post the new location on the door.
