

Teenager | Rakatahi Dental Care Providers

School Year 9 until 18th Birthday

In Aotearoa New Zealand, free routine dental care is available for all eligible teenagers/rakatahi every year until their 18th birthday, even if they have left school.

In the Southern region, their free dental care transfers from the Community Oral Health Service to a participating local dental provider at the start of school year 9.

How Is Free Dental Care Provided?

At the end of school year 8, the Community Oral Health Service will support you and your teenager/rakatahi to transfer to a participating local dental provider. This is a dentist, oral health therapist or dental therapist who is approved to provide free dental care on behalf of Health New Zealand | Te Whatu Ora.

Once your teenager/rakatahi has transferred to a local dental provider, they are released from the Community Oral Health Service. This means you and your teenager /rakatahi take up responsibility to arrange and attend their appointments.

You and your teenager/rakatahi can choose which dentist or therapist they would like to enrol with from the list provided on the next page. They are also able to change to another listed provider at any time and do not need to let us know.

***Please note – only the listed dental practices are able to provide this routine dental care free of charge**

Important Things To Know

- Routine dental care is free for all eligible teenagers/rakatahi until they turn 18 even if they have left school
- Only the listed dental practices are able to provide this free routine dental care
- Some of the listed dental practices may only enrol your teenager/rakatahi if other members of your family/whānau are already enrolled with that practice
- We make every effort to ensure this list is up-to-date, however some practices may not be taking on new patients if they have reached their maximum patient number

For More Information

Please contact the Community Oral Health Service or visit the website at:
