

# Using SchoolPoint to choose your courses online for 2022

Go to the website: **<https://southerncross.schoolpoint.co.nz/>**

Logon to the website with your usual student username and password - use the link at the top right-hand corner of the screen. If you can't remember your details, please email your Maitime teacher.

Click on 'My Courses' to start browsing the courses available to you. **'Courses for Me'** will show you all the courses that you can choose. **'Learning Areas'** will show you all the learning areas and you can search from there.

If you would like to find out more information about a course, click on it. You will then be able to see the course outline, the careers pathway, including jobs this subject is connected to, and how many credits are available (if it is an NCEA course).

Talk to your family about the careers you are interested in and the subjects you are wanting to study in 2022.

When selecting your courses, you will see empty bubbles on the right-hand side of your screen. You need to select enough courses to fill your bubbles plus two backup options. Some subjects have been pre-selected for you already because they are compulsory subjects, but the rest of your choices are up to you, depending on your career pathway, your interests and your strengths.

When you have selected all your options, click on the 'My Courses' tab at the left-hand side of the screen. You will be given the opportunity to check your choices. If you are happy with these choices, click the 'Complete My Courses' button.
