Education vs Trade

BY THE AGE OF 28

An apprentice has earned \$172,000 more than BA, BCom. and BSc Graduate

A Mechanical Engineer has earned

\$185,998

more than an Accountant

a Plumber has earned

\$28299

more than a Medical Graduate

a Flooring installer has earned

\$123,118

more than a lawyer

Looking forward, it is important to remember and note that both university degrees and trades are vitally important to our society. Also remember that a student whom takes a larger loan to study professions such as medicine, dentistry or engineering for example will be in a fairly comfortable position once qualified and earning in their chosen profession. Studies have shown that one in five students do not complete the first year of university and two out of five will not have a degree after four years.
