Nomination for Amesbury School Board of Trustee

I have been working in the IT industry for over 12 years and I have vast experience in Software Testing and Team Management. I have been leading and managing the teams since year 2010. If I will be given an opportunity to be a parent representatives (Board of Trustees), I will bring my leadership qualities and various management skills.

I am currently working in an agile environment and I am a certified Scrum Master. As part of this, I am mentoring and coaching my team with the processes and skills needed to perform various activities required to complete the assigned goals. In the agile environment I have learnt a lot, to handle the situations where the requirements are very competitive and ever changing. I believe that these skills will be beneficial to improve the various areas in Amesbury School education Pattern and to strengthen their grip in the area and even in the national level.

In the past, I have worked as a Teacher, teaching computer skills to the kids of age 7 to 10. I am keen to empower school kids with providing great ideas to engage them in many activities apart from their normal curriculum for instance, Code club. I am also currently associated with the Wellington Hindi School and teaching the language to the enrolled students with a different pattern.

I am a very social person and have been part of many social gatherings in various areas of interest, including Kids Stalls, hosting during various events including Diwali Fest organized by Asia NZ. I have participated in fund raising events for SPCA for last 2 years.

We have moved to New Zealand 5 years ago with a passion and energy to live and work in NZ. I think if I will be given this opportunity to be part of Amesbury School Trustees, I will be able to fulfil the role with honesty and full dedication.
