

Introducing CarryBENA!!

We are CarryBENA, a young enterprise group consisting of five year 13 villa girls. Our main focus is to spread awareness of plastic pollution in New Zealand.

We have designed a product that will help promote the reduction of the use of plastic. In order to reduce the devastating effects that it is having on our environment.

Our product consists of a large-scale carabiner equipped with reusable grocery bags. The purpose of this is to provide an easy handling and quick storage solution to shopping. As well as providing an alternative option to plastic bags. With 10% of all profit going to our chosen charity, Sustainable Coastlines. This charity has a similar vision as us and use their recourses to clean up our beautiful New Zealand beaches.

If you are interested in purchasing our product please email carrybena@gmail.com or message us on our [Facebook page](#). Your support would be greatly appreciated.

By purchasing one of our products you are not only helping yourself now by helping those in future generations to come. Do your part and get behind this awesome business venture.

The Bags are \$15.00 and can be ordered via the links above.
